PRESIDENTS’ COLLEGE
education for a lifetime

SCIENCE AND TECHNOLOGY

WATER, WATER EVERYWHERE, AND NOT A DROP TO DRINK—Laura Pence
Fri., Feb. 5, 12, 19, 26; 9:30-11 a.m.

HOW IT IS WE FLY THE FRIENDLY (?) SKIES—Tom Filburn
Thurs., April 7, 14, 21; 4:30-6 p.m.

LIVING IN A DANGEROUS WORLD—Stephan Bullard
Wed., April 13, 20; 3:30-5 p.m

MORE LIES, MORE STATISTICS—Jean McGivney-Burelle
Fri., April 15, 22, 29: 10:30 a.m.-12 p.m.

All classes held in Mortensen Library, KF Room, unless otherwise noted.

UNIVERSITY OF HARTFORD
PRESIDENTS’ COLLEGE
SCIENCE AND TECHNOLOGY

» WATER, WATER EVERYWHERE, AND NOT A DROP TO DRINK
   —Laura Pence
   An abundant supply of clean water has historically been a vital resource in the growth of populations, cities, and industries. That supply is becoming increasingly threatened by degradation of the water quality, the stresses of burgeoning populations, and climate change. In this course, we’ll explore the history and challenges of providing water to communities, particularly in the American West and closer to home in Connecticut. We’ll then look at California’s epic drought and the implications for the future.
   An Alumni Welcome Program course
   Cost: $75; Fellows and UHart Alumni, $60

» HOW IT IS WE FLY THE FRIENDLY (?) SKIES—Tom Filburn
   What keeps airplanes up in the air? This course will explore the physics and engineering of aspects of flying that we tend to take for granted, such as electricity and auxiliary power units, de-icing, water, air-conditioning, landing gear and brakes.
   Cost: $70, Fellows, $55

» LIVING IN A DANGEROUS WORLD—Stephan Bullard
   It seems as though every time we turn on the news, something horrible has happened. Passenger planes are shot from the sky, California burns, volcanoes erupt unexpectedly. The list seems endless. This course will take an in-depth look at disasters and how humans experience stressful situations. Learn how to avoid being a statistic when disaster strikes and become a survivor. This class will expand upon an earlier Presidents’ College class, and will examine disasters not previously covered. All participants are welcome. Attendance at the previous class is not required to participate.
   Cost $45, Fellows, $35

» MORE LIES, MORE STATISTICS
   —Jean McGivney-Burelle
   In this course we will continue to explore how statistics and probability have been used by corporations, politicians, and the media to sensationalize, inflate, obscure and oversimplify issues. As always, bring your pencil and penchant for head-scratching problems!
   Attendance at Professor McGivney-Burelle’s previous class is not required to participate.
   Cost: $65: Fellows, $50
